

### Industry – Issue O3: Where is industry expanding?

1. Which factors (site and location) have contributed to the migration of factories from urban cores to the suburban regions?
2. Which factors (site and location) have contributed to the migration of manufacturing jobs from:
  - a. The northeastern and Midwestern US to the South and Western states
  - b. The northern and western European countries to the Mediterranean or the new EC members in Eastern Europe?
3. Explain why the percentage of global production located in the MDCs declined from 80% in 1980 to less than 45 % today. Which site and location factors have contributed to the shift? Which LDCs have seen the most dramatic expansion of the industrial sector? Why?
