## Chapter 13 - Urban Patterns: Issue 01, Where have urban areas grown?

- 1. An old German aphorism states: "city air makes free." To a large extent that still applies to cities in the LDC's. Why? Is the same thing true for cities in the MDC's? Why, or why not?
- 2. Check the map of Columbia, SC; identify:
  - a. The central city
  - b. The urbanized area
  - c. Metropolitan Statistical Area

- 3. Check the demographic characteristics of <u>Mumbai India</u>. What might be some of the social consequences of living in a city with the population density of Mumbai?
- 4. What are some of the environmental problems that confront the population of Mumbai and other, comparable, cities in LDCs?

5. Can you identify any micropolitan statistical areas in the greater Columbia area? Which ones? Why do these areas meet the definition of a micropolitan area?
