

Miracle Grain Simulation

1. Create a graph of your results. Analyze them in terms of
 - a. How successful over the ten year span was your farm?
 - b. How many successful vs unsuccessful years did you have?
 - c. What were some of the circumstances (forces) that occurred over which you had no control?
 - d. Did Miracle Grain help you? Did it hurt? Explain your answer

2. Record the total from everyone's last year (round 10). Look up on the overhead to do this. Analyze the information in terms of
 - a. What were the overall results?
 - b. Did Miracle Grain seem to make an impact?
 - c. What forces were helpful? Harmful?
 - d. What were the end results for
 - a. People with over 25 bushels?
 - b. People with under 25 bushels?
 - c. People in the negative numbers?
 - d. People with over 50 bushels?
 - e. People with over 100 bushels?

3. What could have made Miracle Grain more effective?
